DETAILED ACTION

1. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 16 – 29 and 31 – 32 are rejected under 35 U.S.C. 102(b) as being anticipated by Becker et al. (DE 003517114).
4. As to claims 16 – 29 and 31 – 32, Becker et al. (hereinafter Becker) discloses an eddy current method for studying stress corrosion cracking comprising subjecting the component (1) to a first eddy-current producing signal of a first frequency; determining a property of the base material responsive to the first signal having a depth of penetration including the base material; subjecting the component to a second eddy-current producing signal of a second frequency, the first frequency lower than the second frequency, and determining a property of the degraded component responsive to the second signal having a depth of penetration including the degraded region, wherein the property of the degraded region comprises conductivity or permeability; wherein the

base body and the degraded region do not contain ferromagnetic material (Note Abstract and fig. 1a – 1d and 2).

Response to Arguments

6. Applicant's arguments with respect to claims 16 – 29 and 31 - 32 have been considered but are moot in view of the new ground(s) of rejection.
